

DM3 - Module

For a fine and precise regulation of the carbon potential

- Purge and reference air management of oxygen probe (air purge and reference)
- Regulation and measurement of additional gases (Propane or methane, and air) via a massflowcontroller.
- Gas selection valves

Technical specifications :

- Power supply : 24V DC
- Flowmeters : Reference air (0 to 80 L/h), purge air (0 to 150L/h)
- Jaeger electrical connection with single cable
- Air and gas inlet 0.8 bar

Control of 5 %C zones via DM3 on a heat treatment line
